MWS COVID-19 Response: Supporting Daily Wage Earners

a) COVID-19 situation in Azamgarh

- Four COVID-19 positive cases in Azamgarh District on 13th April 2020.
- 8000 people are on quarantine in different villages/locations in Azamgarh.
- Government has started a WhatsApp group of all Village Pradhan’s in Azamgarh district.
- Based on estimation and sampling, more than 25000 daily wage laborers are affected in Azamgarh because of COVID-19 lockdown. They are not able to earn and survival is at risk.
- There is need of about 350000 masks initial approximation based on: a) population, b) people from vulnerable section, c) our own experience of working in the district d) media reports and mask as one criterion to minimise the risk of spread of COVID-19.
- At community level there is hardly any understanding of social distancing.
- Government efforts a) involved asha workers in pre-screening of all villagers b) turned all government schools in quarantine canters c) daily monitoring of lockdown by senior officials c) essential services are in operation

b) MWS COVID-19 Response

Mijwan Welfare Society (MWS) has started responding to COVID-19 from 2nd April 2020 by supporting the daily wage earners through a) Dry Food grain Kit -Includes rice & dal b) Hygiene kit-includes two masks and two soap per person per week. Apart from this MWS has also distributed masks to the general community.

Update of MWS COVID-19 response and distribution (as of 14/04/2020):

c) Innovation by MWS team

- MWS has started a distribution system of ‘pick & go’ where we keep the material (food and hygiene kits) at one place and people come one by one after wearing face mask and pick-up the MWS Food & Hygiene kit and go. This helps to maintain social distancing and neither community nor any MWS staff get in contact with anyone.
- Focus on identifying the most vulnerable through local staff and avoid duplication (where already someone is distributing food materials) through daily getting updates from local media and newspaper.
- For masks making we have used the model of engaging local people to make masks for local people.
- MWS food support kit includes ration (two kgs of rice, 500gm of pulses/dal, two sanitation soap, two safety mask). Three kits per individual so that it could last for three weeks. In total, one person would receive 6 kg of Rice, 1.5 kgs of dal, 6 soaps and 6 masks for three weeks. We are making three separate kits so that the wastage of food in this difficult time could be minimized. If there are four members in a family, they would receive 12 kits.
- Let’s understand Mijwan Welfare Society system of operation in COMBATING COVID-19 and supporting daily wage earners as:

<table>
<thead>
<tr>
<th>First Step (Communication)</th>
<th>Through means of technology (phone), media, government sources and local expertise we identify the area in need (where food and hygiene kit support are required for daily wagers).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Second Step (Procurement-supply chain)</td>
<td>MWS procurement process includes local ration shop as well as from the local farmers (both female &amp; male) -food grains (raw) mainly from those farmers who have extra food and are not able to sell their produce in this lock down period. This helps rural economy to keep going on (without stepping out of home) and maintains supply chain.</td>
</tr>
<tr>
<td>Third Step (Packaging)</td>
<td>MWS packaging of grains and hygiene support kit includes all protection i.e. wearing gloves, wearing mask and maintain social distancing.</td>
</tr>
</tbody>
</table>
Fourth Step (distribution) We use small vehicle so that we could reach to unreached and park the vehicle in the needy area and put the mask on a chair, people come one by one maintain social distancing, wear mask and then pick food and hygiene kit and go. We call it ‘Pick & Go’ method.

- MWS team have distributed 50 masks to Phulpur kotwali (Police Station) and 100 masks to different media people.
- Two villages named Mijwan and Itkohiya of Phulpur tehsil in Azamgarh are 100% mask equipped. MWS team has distributed masks to everyone in these two villages.
- From 11th April 2020 we have included cooking oil (250 grams bottle) in our food kit distribution.
- Cost of production of our mask is INR 3.30 per mask (double layered).

d) Key challenges at community level
- For agriculture labourers it’s an important time to get engaged in crop harvesting, but because of fear of spread COVID-19, they are not able to go outside and get the work. One the other hand farming community is feeling helpless because of unavailability of farm labourers.
- There are many types of fear roaming in the mind of daily wager earners a) about their family members who are still in Delhi, Mumbai and other cities b) when lock down will open and will they
able to get the job c) how long they can survive in their won village d) what about other health issues ( apart from COVID-19) and e) maintain social distance in small houses.

- It’s difficult to lock down villages
- Challenges with local leadership
- Rumours over take reality

e) Key challenges for MWS team in distribution

- Psychological fear of Corona virus keeps on roaming in mind.
- Making community to understand ‘social distancing’. It’s very difficult to convince community on ‘social distancing’. To overcome this MWS team is guiding and community on social distancing and before distribution ensure that everyone must have mask.
- At present we are the only key NGO working on supporting daily wage earners. There are certain organisation and individuals who are also engaged in food and health kit (mainly mask) distribution, but most of them are not registered and they themselves are not following the basic practice of social distancing. This might lead to give wrong message in community about social distancing.
- Some of us working at MWS are away from our own families, thus managing psychological (especially a sad situation) pressure is another key challenge.
- Its harvesting season, and farmers have to go out and it’s difficult to maintain social distancing there. MWS team is also guiding farmers on this.
- On one side community want to be safe, on the other hand they also want lockdown to be open.
