distributed

**50+** Yoga sessions

4 QUALITY  
EDUCATION

## MWS COVID-19 Response

With COVID-19 situation, lockdown and challenges with opening schools, Kaifi Azmi Girls Intercollege, Mijwan village (India) has adopted a new model of teaching **RNSF-Record-Notes-Share and Feedback model** where the school has created an online platform on onedrive. Teachers every day record their sessions makes notes and upload it and the link of this one drive is shared with all the students who have smartphones. On the one hand they can go on the link, listen to the recordings, and go through the teachers's notes. After which they can also share their feedback on the link. On the other hand, those students from families that don't have smartphones, teachers are reaching them with their handwritten notes, books and are also assisting them through phone calls at an allocated time to clear their doubts. This helps students continue their education even during the lockdown period.
